### CHS

CHS Inc. is a diversified and financially stable agribusiness ranked among global Fortune 100 leaders and owned by North American farmers. We value our tradition of building lasting, mutually rewarding partnerships with our customers. CHS Processing & Food Ingredients has a long history of sourcing and processing soybeans and developing solutions to meet the needs of our customers. With our deep involvement in the commodity markets, we can also help with buying and inventory strategies. CHS Processing and Food Ingredients offers a full line of soy products including Honeysoy® soy flour, soy isolates, soy concentrates, textured soy protein products, both flavored and unflavored, and edible Savorysoy® soybean oil. Our stringent quality assurance programs protect product quality and safety throughout all production steps, and a global manufacturing footprint allows us to easily satisfy both GMO and non-GMO needs.

### Dahmes Stainless, Inc

Minnesota-based Dahmes Stainless, Inc. is an innovative, quality-driven, turnkey solution serving the worldwide marketplace. Our primary business focus is the design, manufacture and installation of custom spray drying and evaporating systems. Relying on our vast experience and wide range of proven custom solutions, we are able to match your specifications for the most efficient and cost-effective process. In addition, we also specialize in cutting-edge automation systems, custom manufacturing, energy recovery systems, custom packaging systems, agglomerators, construction services, pilot plants, spare parts and service as well as existing system renovation. Our markets include, but are not limited to, food, feed and dairy processing and chemical and renewable industrial materials. Our family of companies allows us to offer a full-service R&D center with toll drying and general contracting services. DSI is committed to meet or exceed our customers' expectations both prior to sale and after.

### Edgewater Fullscope

Food manufacturing is a risky business. Microsoft Dynamics ERP and CRM software solutions, sold by award-winning partners Edgewater Fullscope and Zero2Ten, help reduce risk and keep products on the shelf --- or pull them off quickly --- as needed. We help food manufacturers keep their customers happy, see everything going on in the supply chain, stay compliant and safe, get better forecasts, gain control over manufacturing processes, get more orders, produce quality products, and more. Take control of your supply chain by having power during recalls, eliminating out-of-stocks and controlling new and discontinued products by using solutions powered by proven Microsoft technology. Stop by and let us show you how during the Alltech REBELution.

### ExecuTrain

The need for learning never stops. New technologies, workplace strategies and the need for continuing education mean your organization requires training that works. ExecuTrain of Kentucky is a comprehensive training and consulting company that focuses on customized learning solutions based on adult learning methodologies. For over ten years we have provided computer training, online learning solutions, IT technical certification tracks, healthcare technology and enterprise resource technology implementations, along with classes and workshops in sales training, leadership, project management and more. No matter what your training or technology implementation challenges are, we would like to show you how we can help.

### Gray Construction

Kentucky-based Gray Construction is a pioneer in design-build, specializing in engineering, architecture and construction services for both international and domestic customers. For over 55 years, Gray has been meeting the needs of the food and beverage market across the U.S., with over 160 world-class food and beverage projects totaling more than 10 million square feet. Gray's experience includes production and refrigerated facilities for poultry, pork, beef, further processed meats, pet foods, sauces, aseptic processing, snack foods, baked goods, fluid milk processing, RTE frozen foods, confectionery, beverages and nutraceutical ingredients.

### **Genarex FD, LLC**

Genarex is a technology development and commercialization company that specializes in targeting low value, plant-based, agro-industrial residues for conversion into higher value products. Utilizing a combination of patented and proprietary process methods, Genarex efficiently removes low- quality constituents from agro-industrial residues to create multiple, high- value products. Simply by removing low- quality components from plant-based residues, Genarex inherently produces an enriched and more valuable feed product. Most significantly however, are the high- performance bio-based materials Genarex has been able to create from the otherwise low- value extractants. While technologists have been able to produce bio-based plastics and elastomers from proteins and carbohydrates for decades, their products have been either cost- prohibitive, or exhibited poor performance. Genarex's process methods uniquely allow the otherwise low- value extractants to be converted into materials that maintain, or improve, the performance characteristics of the petroleum and non-petroleum resins displaced, while driving out cost.

### **Hogan Lovells**

Hogan Lovells provides high- quality advice to corporations, financial institutions, and governmental entities across the full spectrum of their critical business and legal issues globally and locally. Bringing together the combined strengths of our predecessor firms, we have more than 2,500 lawyers operating out of more than 40 offices in the United States, Europe, Asia, Latin America, the Middle East and Africa. We offer a unique, high-quality transatlantic capability, with extensive reach into the world's commercial and financial centers. Hogan Lovells has particular and distinctive strengths in the areas of litigation, arbitration and employment, corporate, finance, government regulatory, and intellectual property. We are distinguished by a highly collaborative culture valuing the contribution of our diverse team within the firm and in the wider community. Our style is commercial, service-focused, and friendly. We believe that our commitment to client service and teamwork provides benefits to clients and enhances effective business relationships.

### **ISKY Chemicals**

ISKY Chemicals Co., Ltd, founded in 1994, is a China-based nongovernmental enterprise specializing in producing and distributing chemical products. ISKY is one of the first importers of sulphur into China. Today, ISKY has developed a large, stable customer base, while becoming the most important distributor of sulphur in China. ISKY is also a dominant trace mineral producer in China. ISKY has four subsidiary factories, producing zinc sulphate, manganese sulphate and ferrous sulphate, which are widely used in animal nutrition and crop science. After rapid development for years, ISKY products have been marketed to Asia, Africa, the Americas, Europe and Oceania, totalling more than 50 countries and regions. ISKY has established long- term, stable business relationships with many well-known global chemical enterprises, focusing on our trusted quality.

### **Lexmark**

Since 1991, Kentucky-based Lexmark has been a recognized and lauded leader in imaging and output solutions that help people and organizations improve processes and reduce their costs. Lexmark's award- winning imaging and output technology has continued to evolve as the world becomes more digital and connected. Lexmark sells its products and services in more than 170 countries and is recognized as a global leader by many of the technology industry's leading market analyst firms. The company has acquired and integrated several strategic software companies since 2010, expanding Lexmark's breadth of offerings to include innovative software solutions. Today, the company competes in key growth markets that include managed print services, intelligent capture, enterprise content management, healthcare content management, financial process automation and enterprise search – all focused on helping customers connect employees to the most relevant information when they need it.

### **Microsoft**

Founded in 1975, Microsoft is the worldwide leader in software, services, devices and solutions that help people and businesses realize their full potential.
